EDUCATION

University of Toronto

May 2027

Bachelor of Science - Computer Science (Honours)

- Computer Science Specialist, Mathematics Minor, \$3000 in Scholarships.
- Core Courses: Data Structures and Algorithms, Databases, Machine Learning, Artificial Intelligence.

EXPERIENCE

Software Developer | Angular, .NET Core, SSMS, Node.js, Git, Jira

May 2025 - August 2025

Axiom Group Inc.

- Deployed and maintained ERP (Prism) features **used by 200+ employees** across Canada, USA, and Mexico.
- Streamlined Angular migration from v8 to v19, reducing live production build times **by 25+ seconds**.
- Worked within a Git-based CI/CD workflow using Jira for sprint tracking and deployment coordination.
- Delivered **15+ production features** in collaboration with department team leads and operations managers, spanning inventory tracking, HR forms, accounting logs, and production scheduling.
- Optimized backend RESTful APIs with Node.js and SSMS, for improved querying speeds and API caching.

PROJECTS

🔗 Pathway | Next.js, OpenAI, Chromadb, Git

- Developed a tool for course recommendations and scheduling using Next.js and OpenAI API.
- Improved efficiency by **reducing course search time by an estimated 70%** compared to manual browsing.
- Utilized Python web-scraping with BeautifulSoup to scrape a university website for course information.
- Modeled prompts for a Chromadb embeddings model to **align OpenAI responses** with user queries.

🔗 Fly-Easy | React Native, Flask, Google Firebase, Git

- Led the UI/UX and AI integration for a mobile React Native, Flask, and Firebase airport companion app.
- Integrated Aerodatabox API for realtime airport/flight status, and Google's Places API for location tracking.
- Implemented classical AI constraint satisfaction with greedy algorithms to generate personalized itineraries.
- Assessed efficiency of greedy algorithm using evaluation scripts against Claude Sonnet 4.5's constraint solving, receiving an average score of **83.4 versus Claude's 83**, due to **20% better hard constraint satisfaction**.

🔗 mysh.c | C, Networking, Makefile, Bash Shell Scripting, Linux/Unix

- Engineered a lightweight Unix-like shell in C supporting process control, piping, and job management.
- Implemented TCP socket-based networking for remote execution in inter-process, inter-system communication.
- Designed robust signal handling to manage concurrent processes and prevent zombie/orphan processes.

🔗 Task Tracker | Angular, .NET Core, MySQL, Docker

- Created a full-stack task tracker with Angular, enabling several peers **to manage 50+ tasks in a month**.
- Architected RESTful API using .NET Core and Entity Framework with Docker containerization for deployment.

🔗 Dr.Mario | Assembly, MIPS Architecture

- Programmed complete Dr.Mario puzzle game in MIPS assembly, featuring pill rotation, and collision physics.
- Enforced game state management, collision detection, and win condition logic within hardware constraints.

TECHNICAL SKILLS

Languages: Python, Java, C, C++, HTML/CSS, Javascript, Typescript, SQL, C#, Assembly

Frameworks/Libraries: Angular, Next.js, React Native, NumPy, .NET Core, EF Core, Flask, BeautifulSoup, Unity

Databases: Microsoft SQL Server, PostgreSQL, MySQL

Developer Tools: Git, Docker, Node.js, Vim, Linux, Jira
